Interactive Tutorial 1: Markdown

Working with Markdown

Press `Ctrl + Shift + M` to open a formatted preview on the right.

Basic Text

Write two sentences about yourself, each in a different paragraph.

Headers

Make a 3rd level header with your name:

Emphasis

Write 4 of your favorite words using each type of emphasis:

Lists

Make an ordered list of 3 things you hope to achieve this semester, and elaborate on them with sub items. Then, make an unordered list of 3 classes that you're taking this semester:

Links

Write a sentence describing your major, and insert a link to your major's department website:

Images

Insert the Cornell seal image with:

1. A relative file path(`/Images/Cornell_University_seal.png`)
2. A URL
   (https://raw.githubusercontent.com/AguaClara/aguaclara_tutorial/master/Images/Cornell_University_seal.svg.png)

Code Formatting

Put the name of this file in an in-line (single backtick) code format.

Put the following text in a Python-formatted code block:

```
def foo():
    print("Particles of a feather...")
    print("...floc together!")
```

Tables

Create a table listing your 3 favorite animals, books, and places on campus. Use a different alignment for each column.

Blockquotes

Write your favorite quote. It must be attributed to Albert Einstein.

Horizontal Rules

Add a horizontal rule:

LaTeX Formatting

Copy the equation towards the end of the [Markdown tutorial](#) and paste it here:
